PROFILE

Dedicated UI/UX designer & front-end developer at **Georgia Tech** aiming to acquire a **UX design internship**. Adept in collaborating with designers, developers, and other professionals to achieve high goals and develop brilliant digital experiences.

EDUCATION

Georgia Institute of Technology, pursuing B.S. Computational Media

Atlanta, GA

Aug 2019 — Present

- **Expected Graduation 2024**, Dean's List, Computational Media Ambassadors
- Relevant coursework: **User Interface Design**, Principles of Visual Design, **Global Art & Design**, Computational Media, **Object-Oriented Programming**

EMPLOYMENT HISTORY

UX Engineer, Harpie Blockchain Solutions

Remote

Nov 2021 — Present

- Lead **UI/UX designer, engineer** at DeFi (**Ethereum/NFT**) pre-seed startup.
- **Slashed steps to customer acquisition by 33%**, radically transformed UX for payment and onboarding to boost customer experience (**CX**) and retention.
- **Prototyping** user onboarding and **hi-fi wireframes** of SaaS using **Figma**.
- Designing **React** components in **Next.js/Tailwind/Apollo/Git** environment.

Software Engineering Intern, ChildPlus Software

Sandy Springs, GA

May 2021 — Aug 2021

- Specialized in using **Sass** to design tens of accessible, attractive **Angular** components with **Redux state** for **responsive** data-entry application.
- Presented daily and **led presentation** over intern team's **agile development** achievements to over 30 developers, designers, supervisors, and the CEO.
- Architected reusable front-end component blueprint that **eliminated project time-to-completion by 20%**, streamlined state management pipeline.

PROJECTS

Quasar — Crypto, AR, ML Storefront (GT Hackathon)

HackGT 8

Oct 2021

- **UI/UX Designer** for HackGT 8 submission, recognized as **NCR Machine Learning 2021 Challenge Winning Team** and awarded SWE internship offer.
- Realized retail gamification, crypto support with MetaMask, echo3D/ARKit 2 **augmented reality**, interactive 3D renders, and QC **Blockchain ledger**.
- Rapidly designed intelligent, stunning user experience for futuristic online shopping using **React/Tailwind/Figma** in under 36 hours.

Georgia Milestones EOC Assessment UX Study

AP Research

Nov 2018 — Jun 2019

- Conducted extensive in-person experimental **UX research study** on UI pagination with **random sampling** of 30 Georgia high school students.
- Collected **quantitative data** on 60 test scores & analyzed **HCI implications** with **statistical hypothesis test** for blocked difference of means.
- Culminated in detailed 51-page **technical research paper** and **oral presentation** to The College Board's panel of judges, achieved 5/5 score.
